

## Community Dialogue Meeting

Monday November 29, 2021  
Strough Middle School

(801 Laurel Street - Rome, NY 13440)

6:00 p.m.

Rome City School District is in the process of assessing the District catchment zones and studying the educational and physical capacity of each school facility.

It is anticipated that this study will propose options to best align the projected student enrollment and educational goals with the functional capacity of the facilities and identify potential for redistricting and facility improvements.

As part of this effort, community input is vital to understanding the community and student aspirations and goals related to the school facilities, as well as understanding the unique qualities of each school and its surrounding community.

**We invite you to participate in the community dialogue session to contribute such feedback.** The session will provide a study progress presentation as well as facilitate full group and breakout group activities to focus the discussion and gain insight into the community position. The Rome City School District welcomes participation by any interested community member.
